Title
Explore FTB login

Charter
With Devtools, Xray *Checking the application's login function for different users*
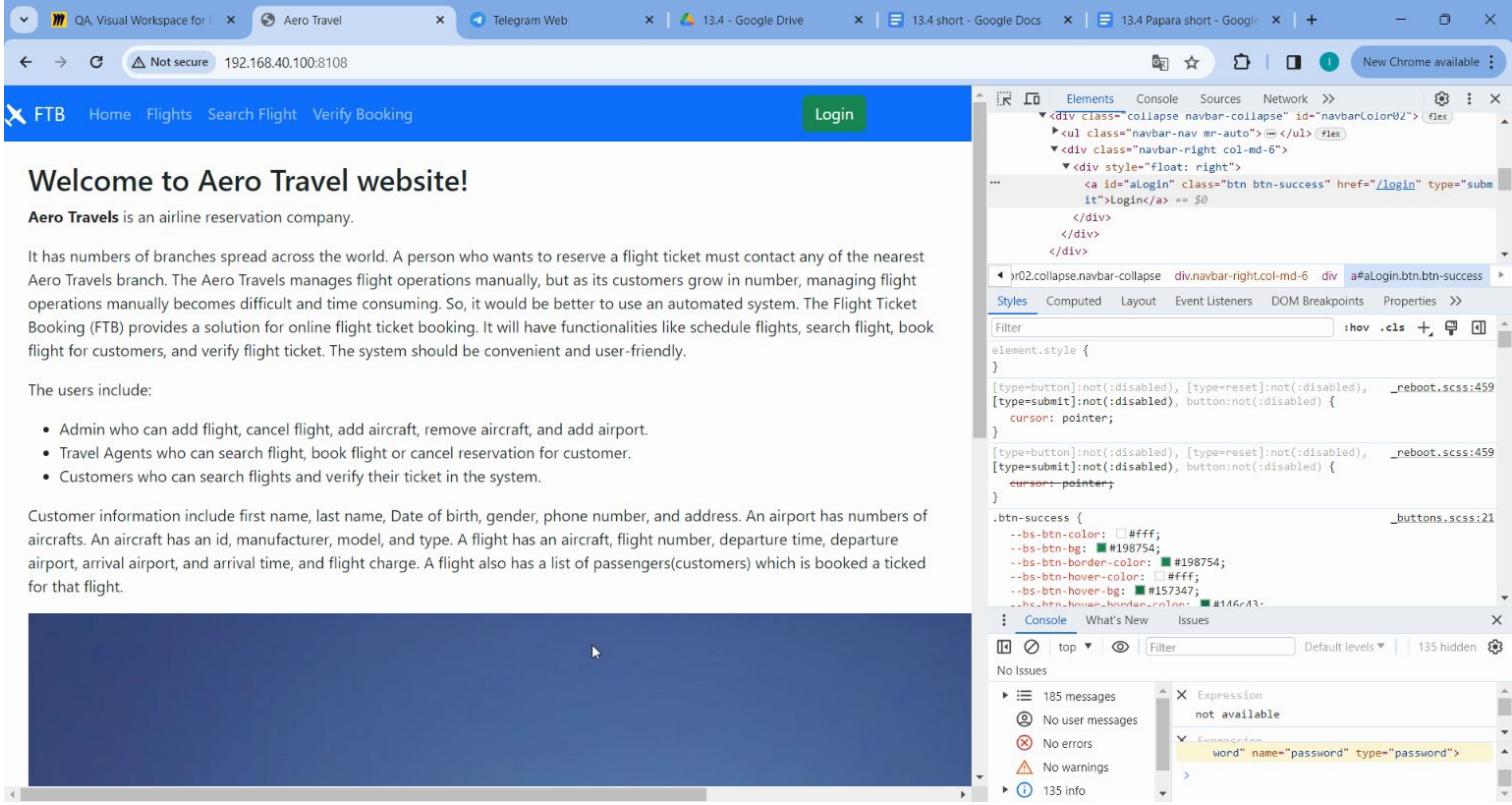

Preconditions

▶ **Session started • Duration 00:39:15 10h56 | 07-01-2024**

📷 **00:00:48 | Screenshot • Comment**

Our team has a task to **do the exploratory session of the FTB application about login part**

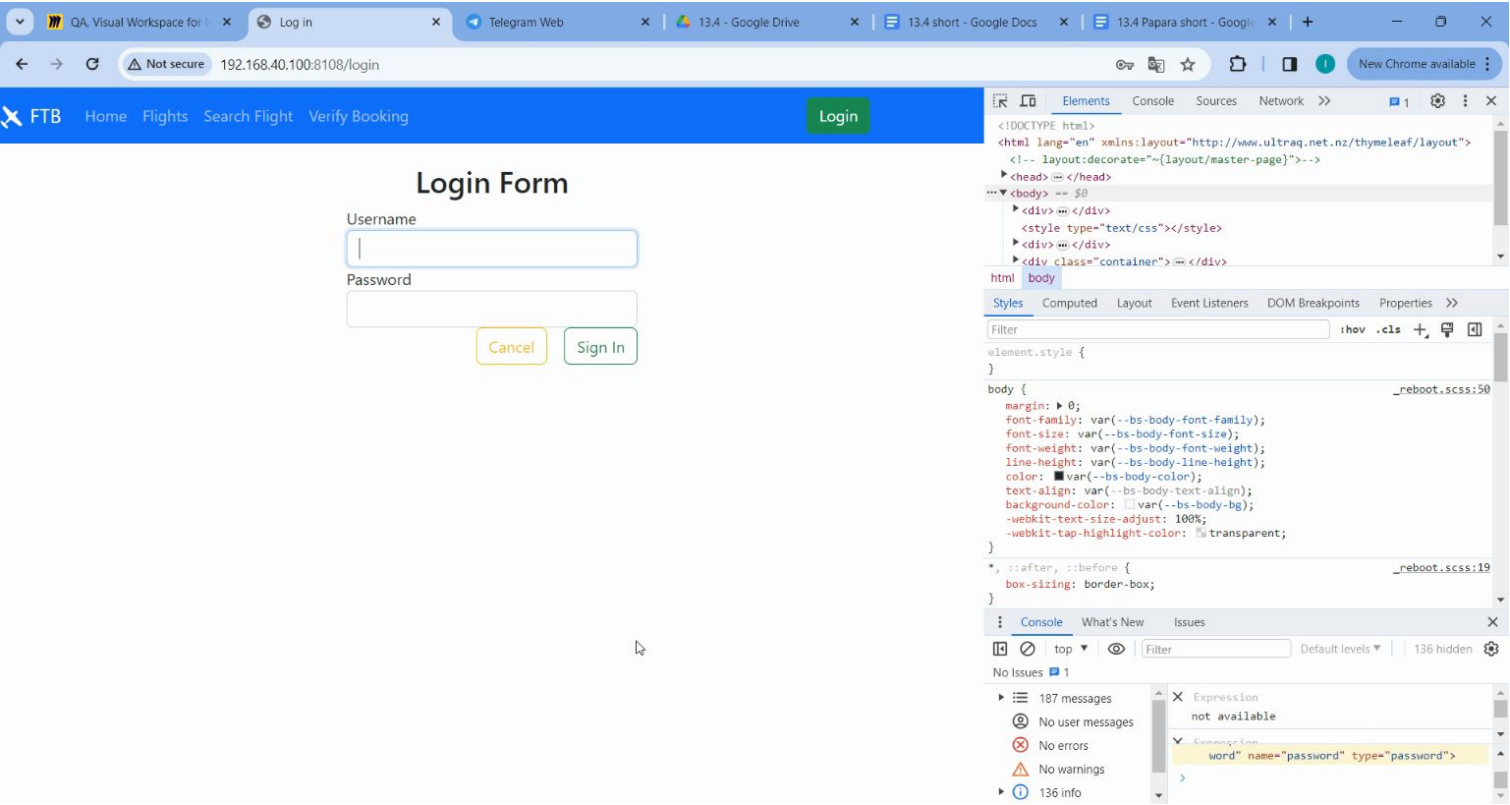

📷 **00:06:54 | Screenshot • Comment**

Let see UI. We have 3 users: Admin, Agent, Guest. Users have different roles.
Admin and Agent users need to login . We can see that Guest or Customer can see Home Page, Flights List, Search Flights, Verify Booking. Guest does not need to login.
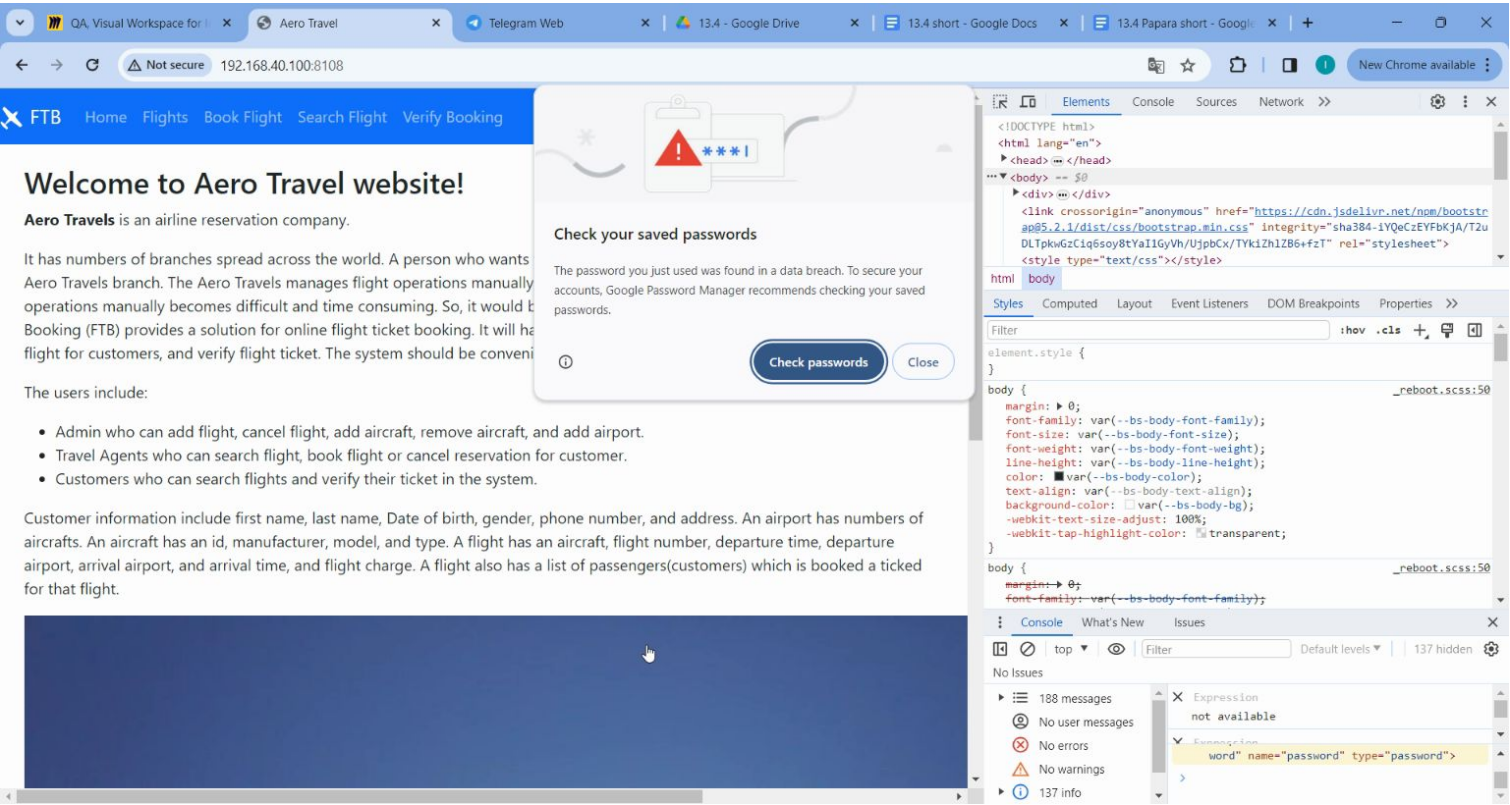

00:09:44 | Screenshot • Comment

When we press "Login" button we see "Login form"

00:12:38 | Screenshot • Comment

When we press "sign in" we see message from our browser.

00:13:59 | Screenshot • Comment

Now we can see agent can log in and can see Home page, Flights List, Book Flight, Search Flight, Verify Booking
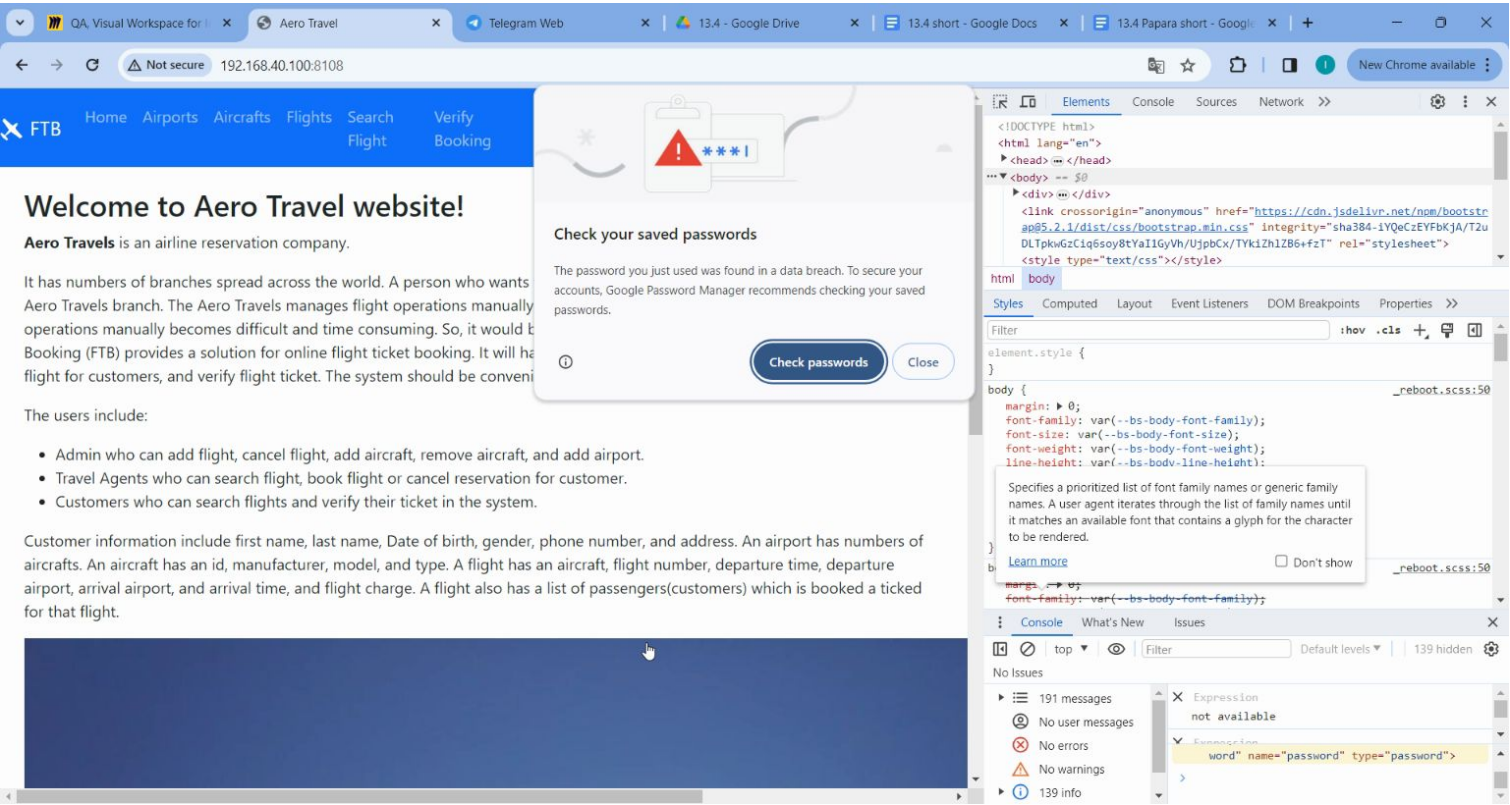

00:14:46 | Screenshot • Comment

Let us log in like a administrator

00:15:25 | Screenshot • Comment

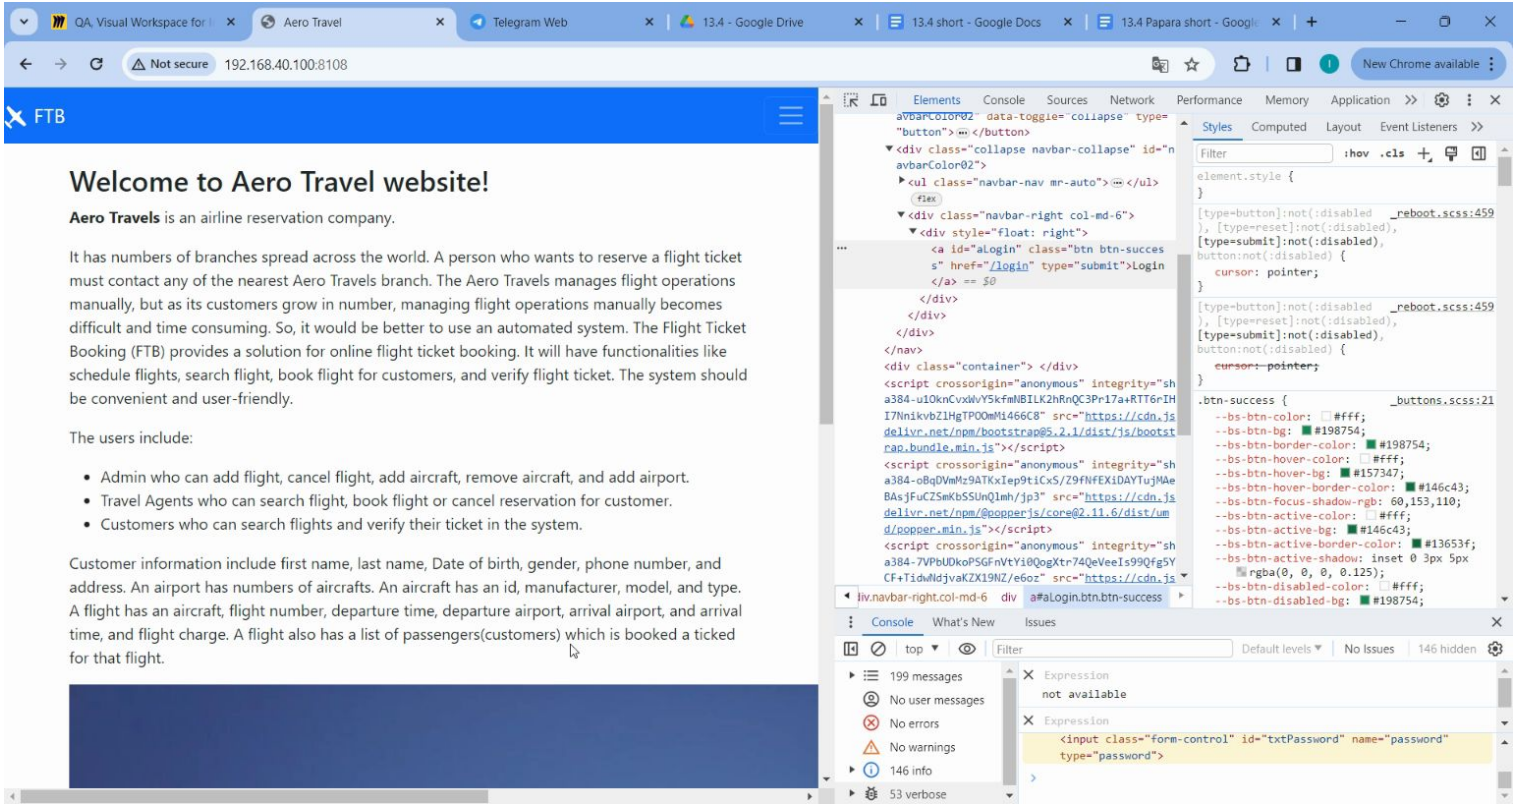

We can see the same notification from our browser

00:16:38 | Screenshot • Comment

Administrator can log in and he can see Home page, Airports, Aircrafts, Flights, Search Flight, Verify Booking

If we make the panel of Devtools wider, than we can not see all buttons on blue panel and our "Login" button also has disappeared
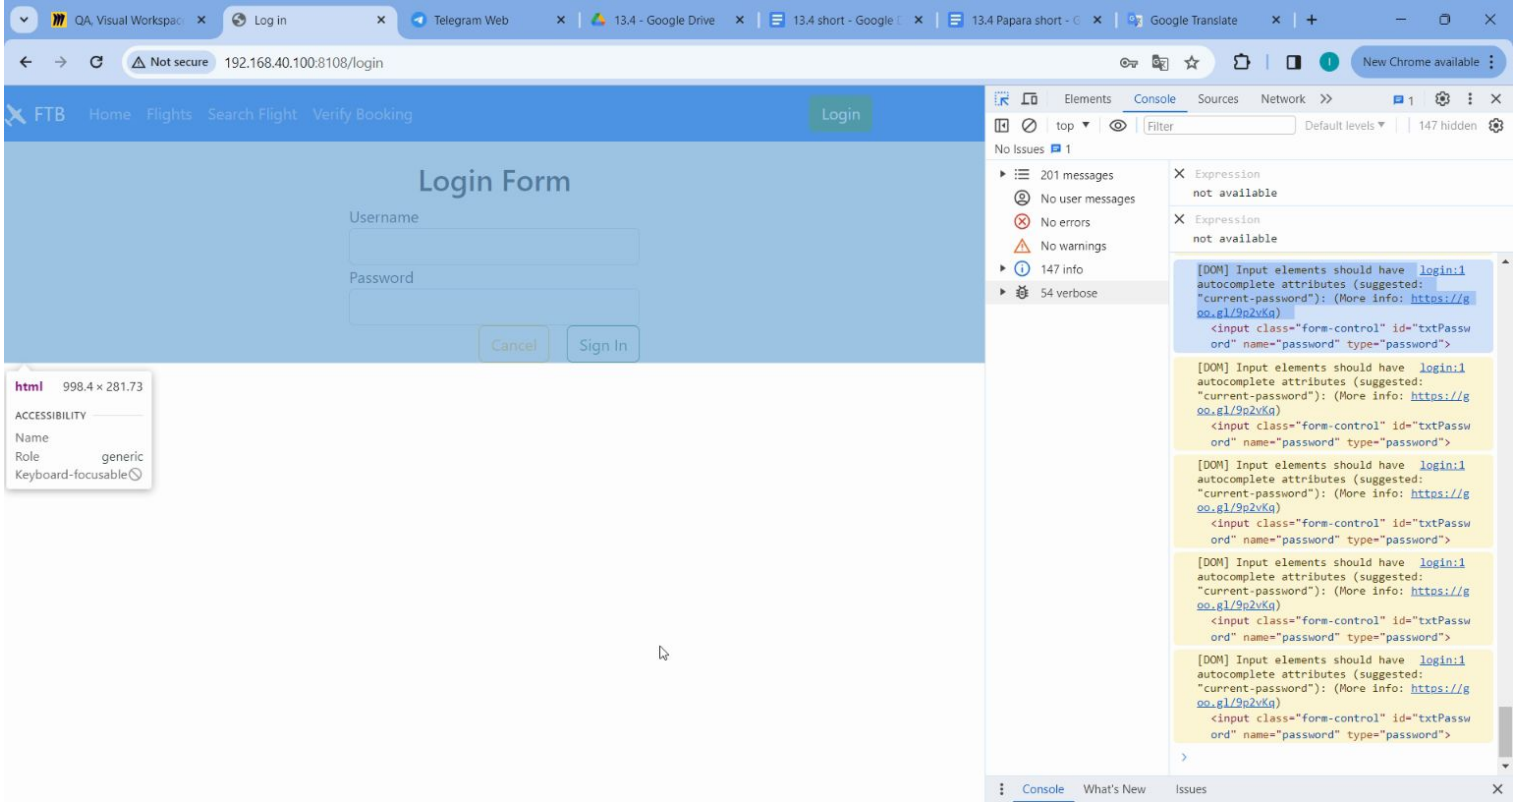

If we use Toggle device toolbar we can see the same situation on a small screen
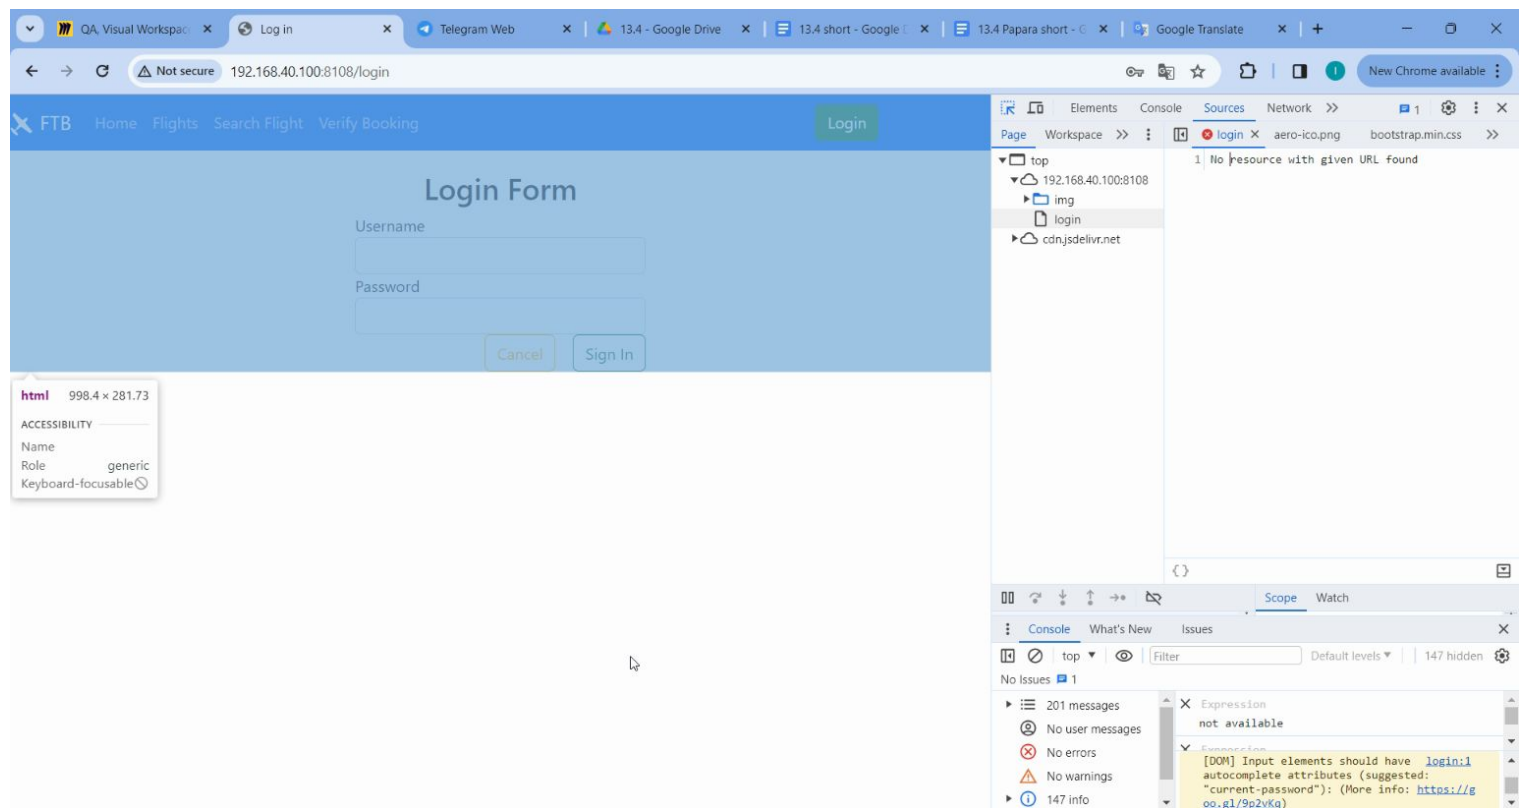

On Console Panel we can see verbose: [DOM] Input elements should have autocomplete attributes (suggested: "current-password"): (More info: https://goo.gl/9p2vKq) <input class="form-control" id= "txtPassword" name="password" type="password">

On Source panel we can see notification: "No resource with given URL found"

When we logged in as admin.
We can see request with method Post with name "login"
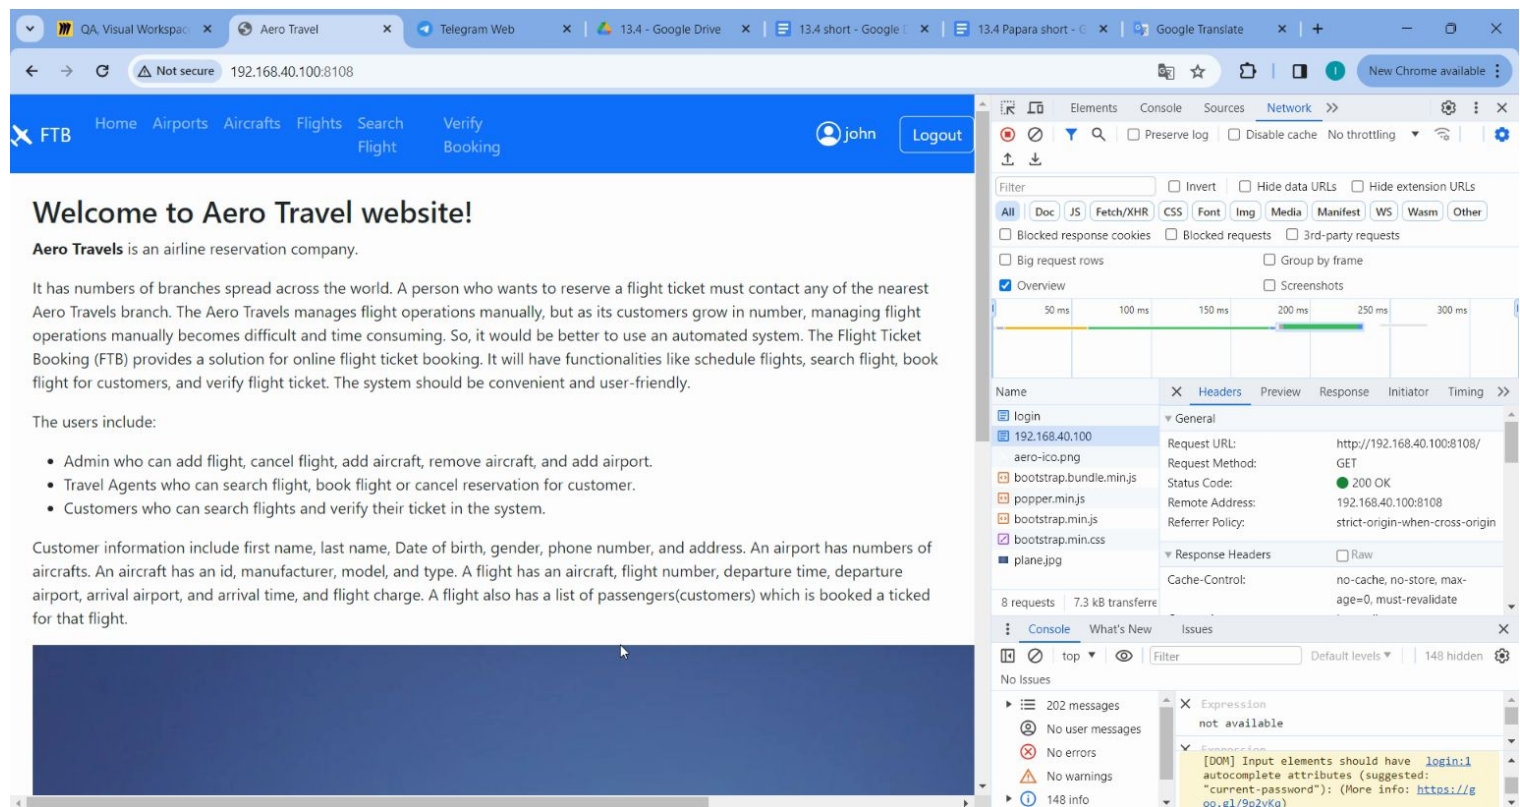

And request with method Get

If we took not the right login and not the right password. We see such message
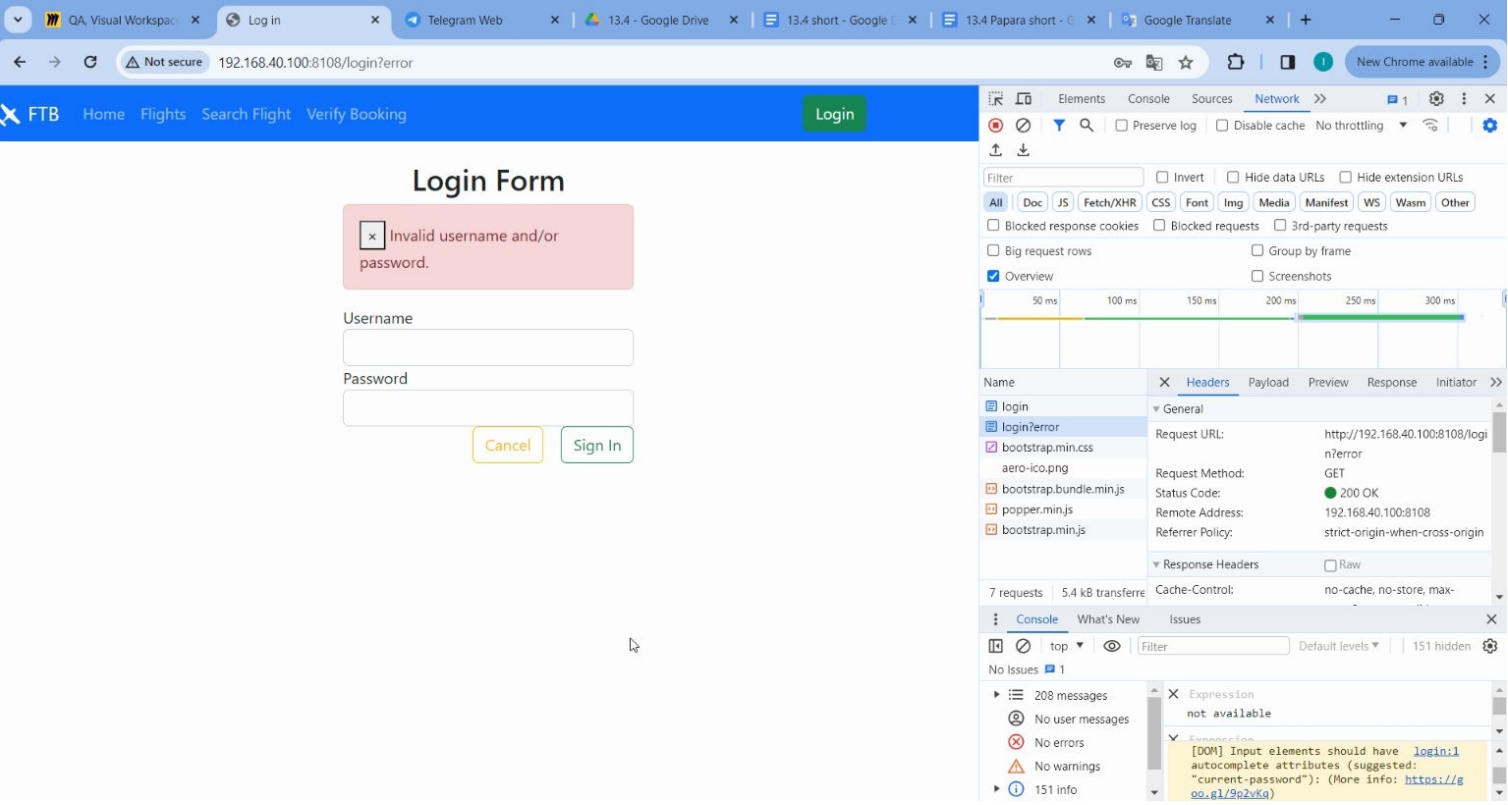

If we took right login and not right password. We can see the same situation
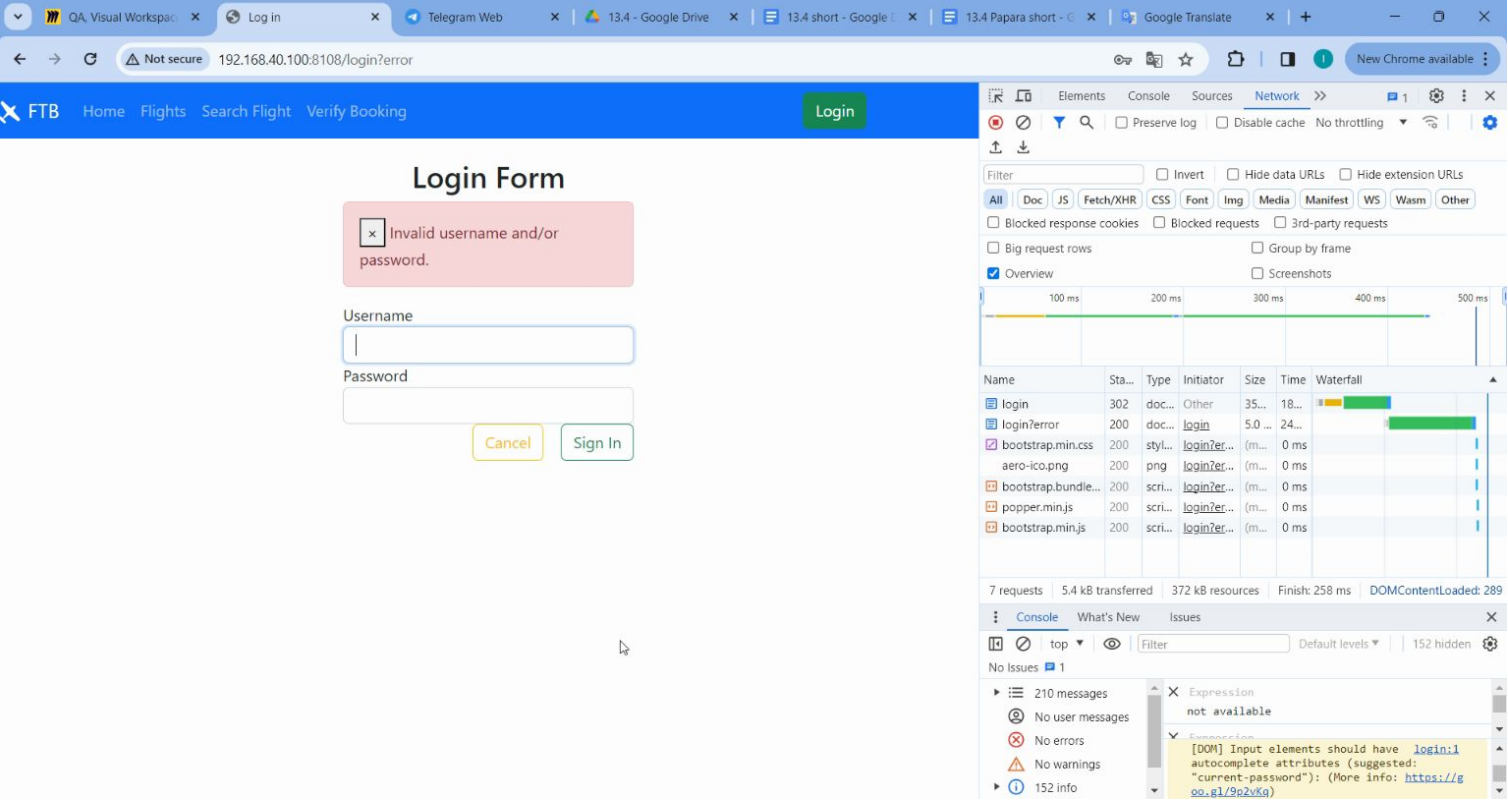

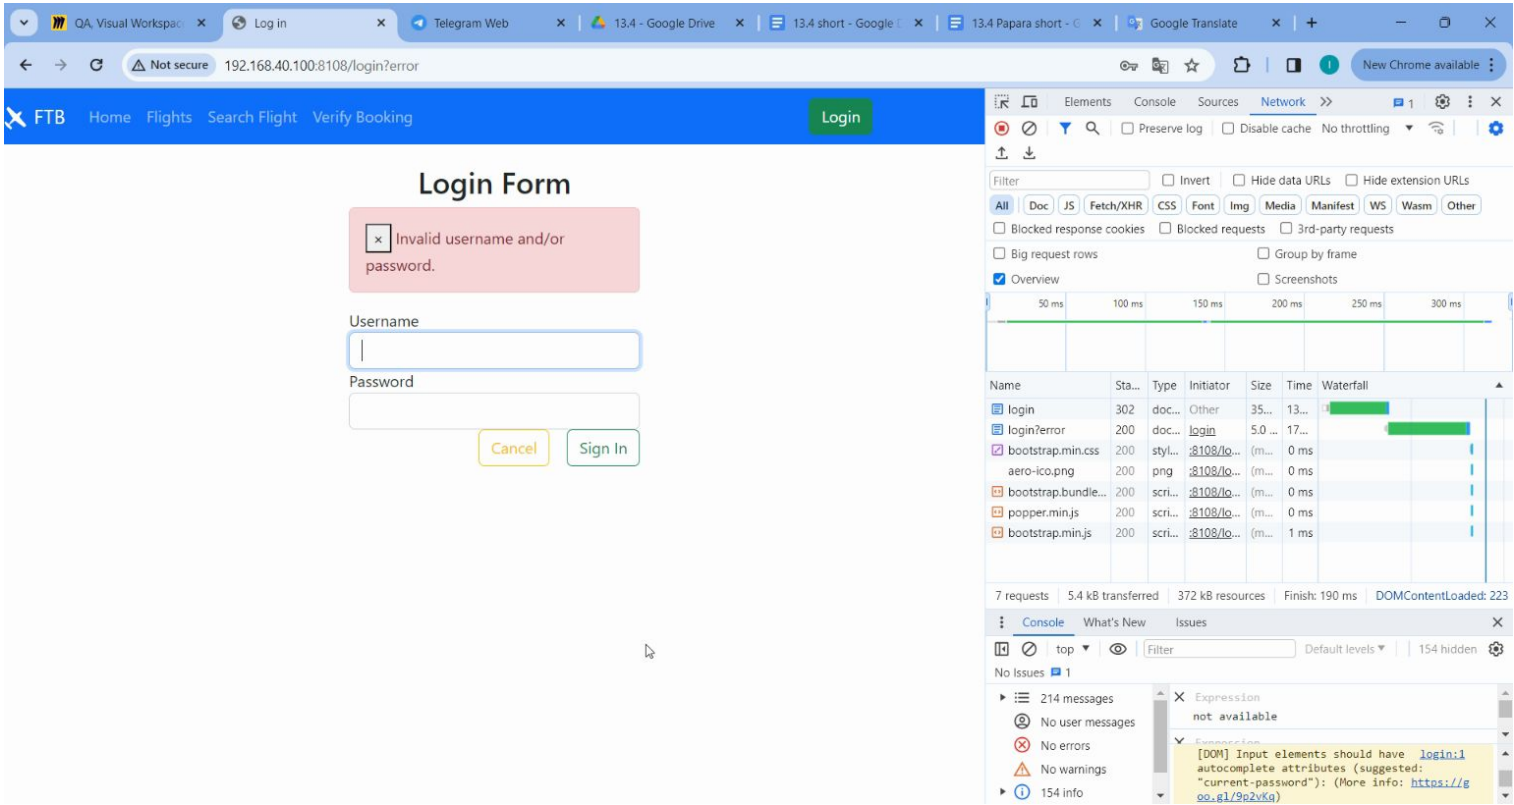

If we took not right login and right password
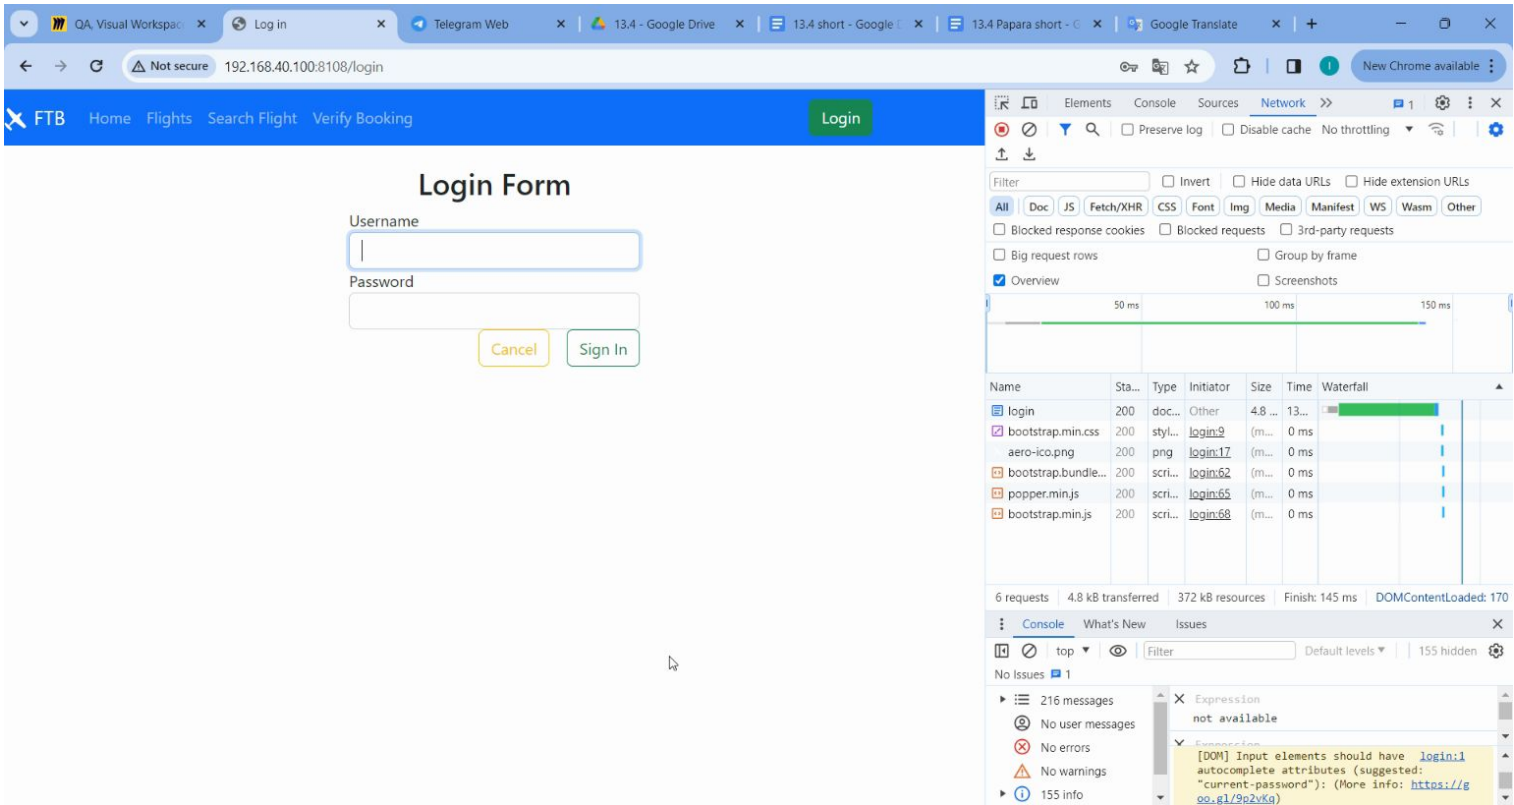

00:37:39 | Screenshot • Comment

We can see that there are no restrictions for character limits for username and password.

00:38:04 | Screenshot • Comment

And if we took them too long we can see the same message

00:38:38 | Screenshot • Comment

Let us take empty fields

00:39:00 | Screenshot • Comment

We see the same message

Session ended • Duration 00:39:15 11h35 | 07-01-2024
